Fluffy 3D Snowman

Artistic Adventures

Ages: 3-5

30 minutes

Growup needed

Bring winter magic to life with homemade 3D paint and create a wonderful 3D snowman! This is a delightfully engaging sensory art activity for young children. Once dried, the snowman feels incredibly soft and fluffy, and your child won't be able to resist squishing it over and over again.

Materials Needed

Shaving foam
White PVA glue
Four glass bowls
One large glass bowl
Food colouring
Measuring spoons
Card paper
Ice lolly sticks
Paintbrush
Spoon

Step-by-step tutorial

Step 1

Add three cups of shaving foam to the large bowl.

Step 2

Add two cups of PVA glue and mix thoroughly with the spoon.

Step 3

Divide the mixture between the four small bowls, then add different food colourings to each bowl and mix well.

Step 4

Using the paintbrush, take some of the shaving foam mixture and paint your snowman on the card paper. Make sure to apply the mixture thickly./p>

Step 5

Wait patiently for 24 hours to allow the snowman to dry.

Step 6

Once the snowman is dry, try pressing it with your fingers. How does it feel?
