

Step-by-step tutorial

Step 1

Cut out the printable templates along the outline.

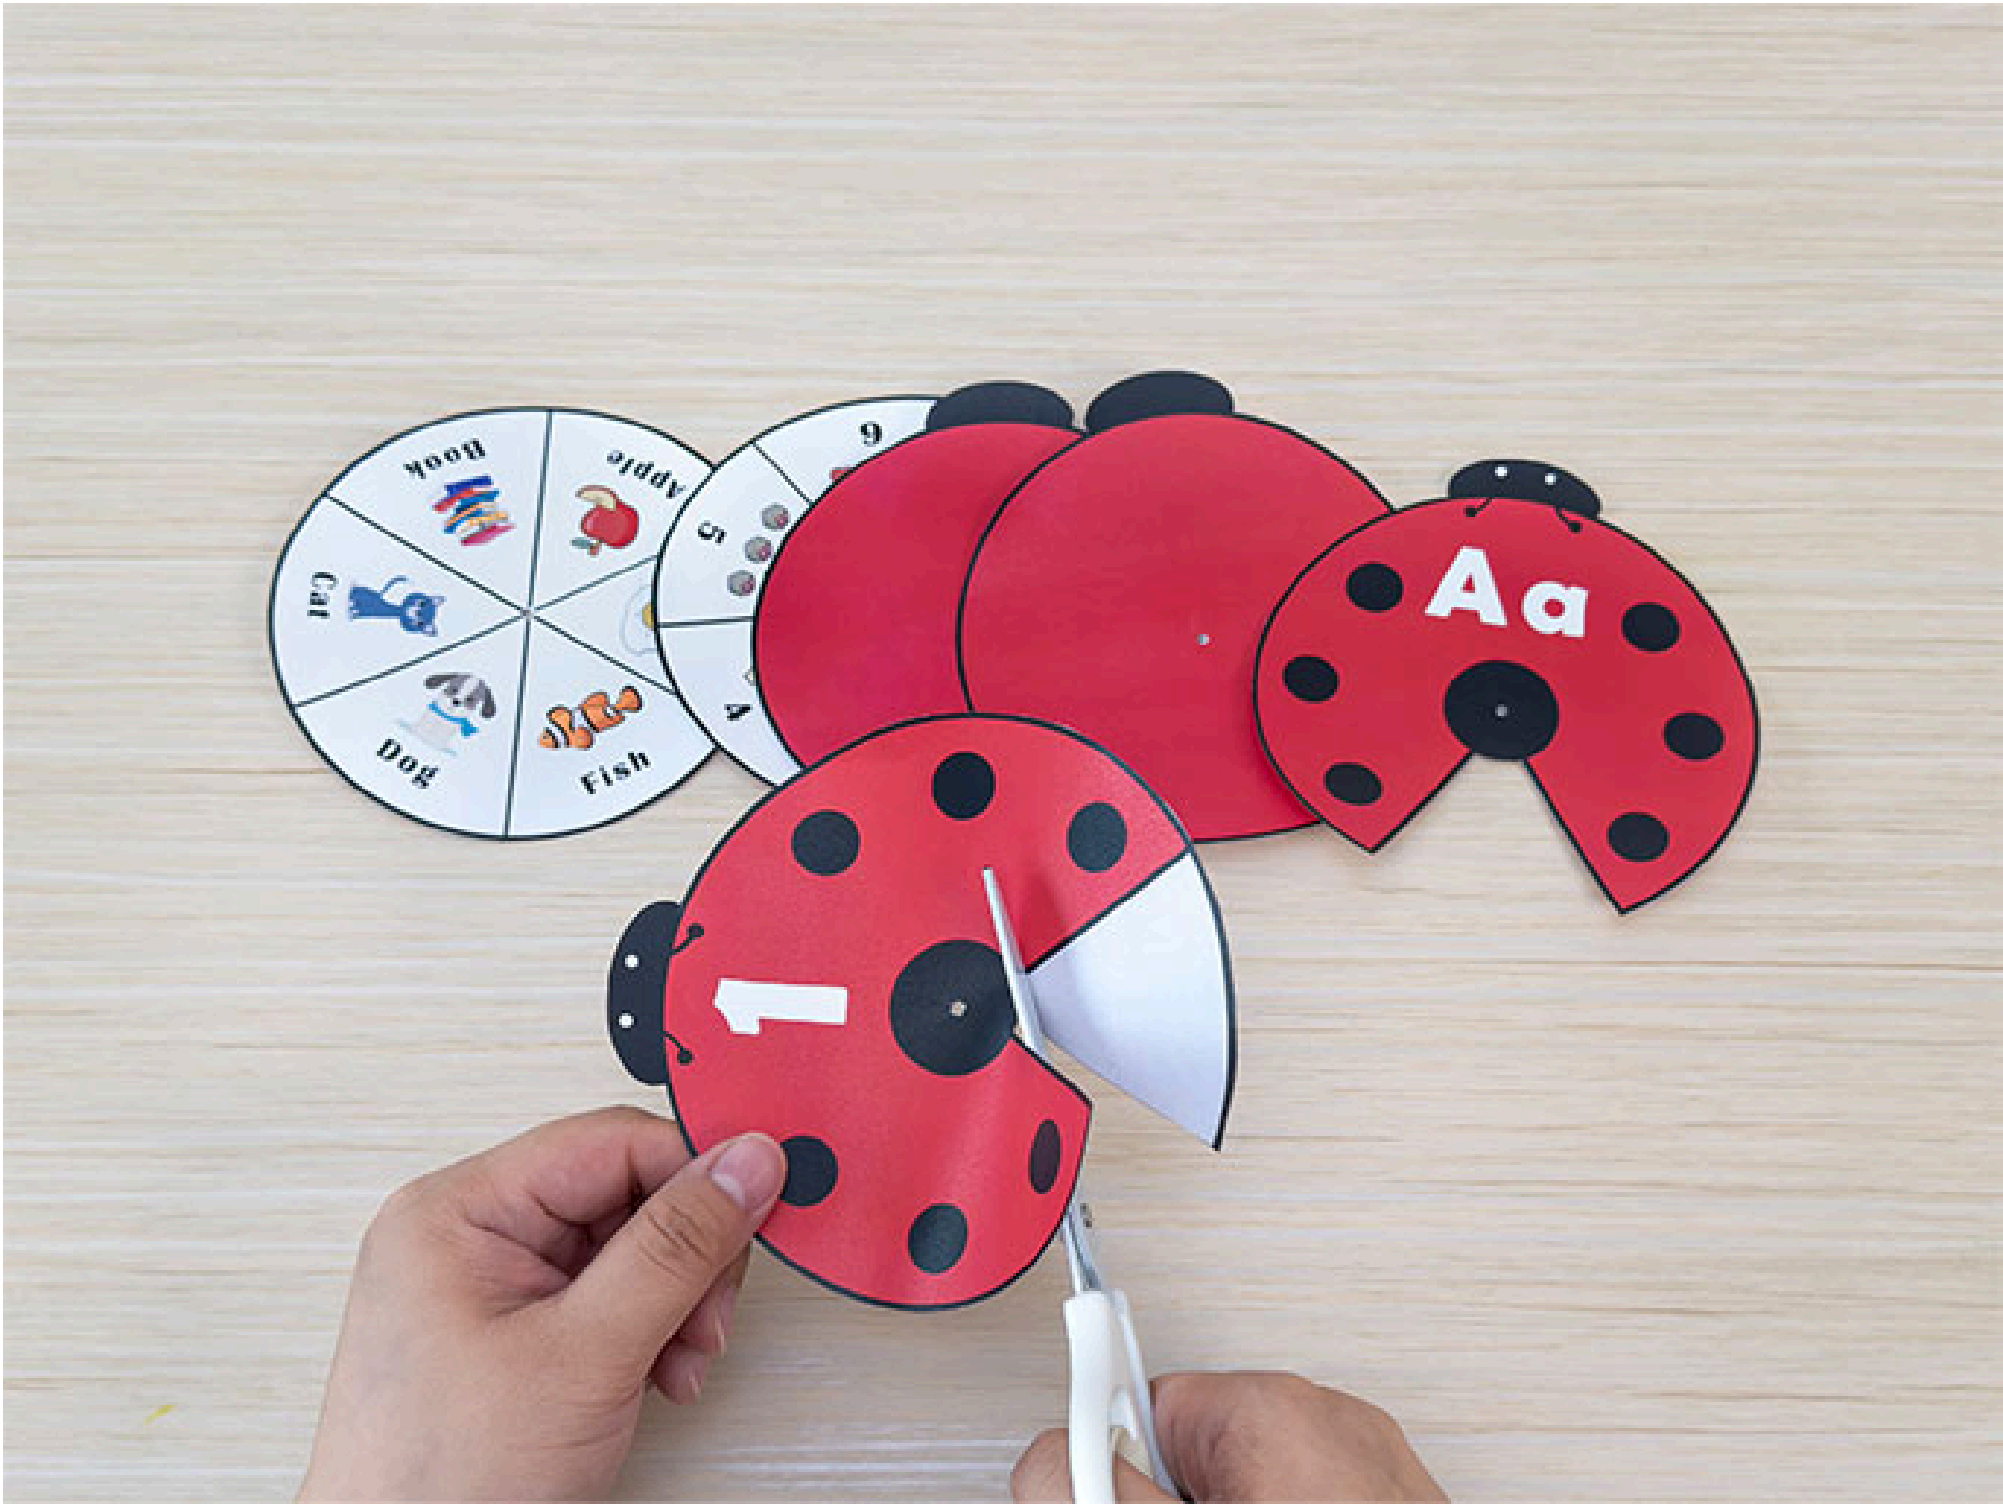

Step 2

Make a hole in the white circle at the centre of each template piece using a pencil.

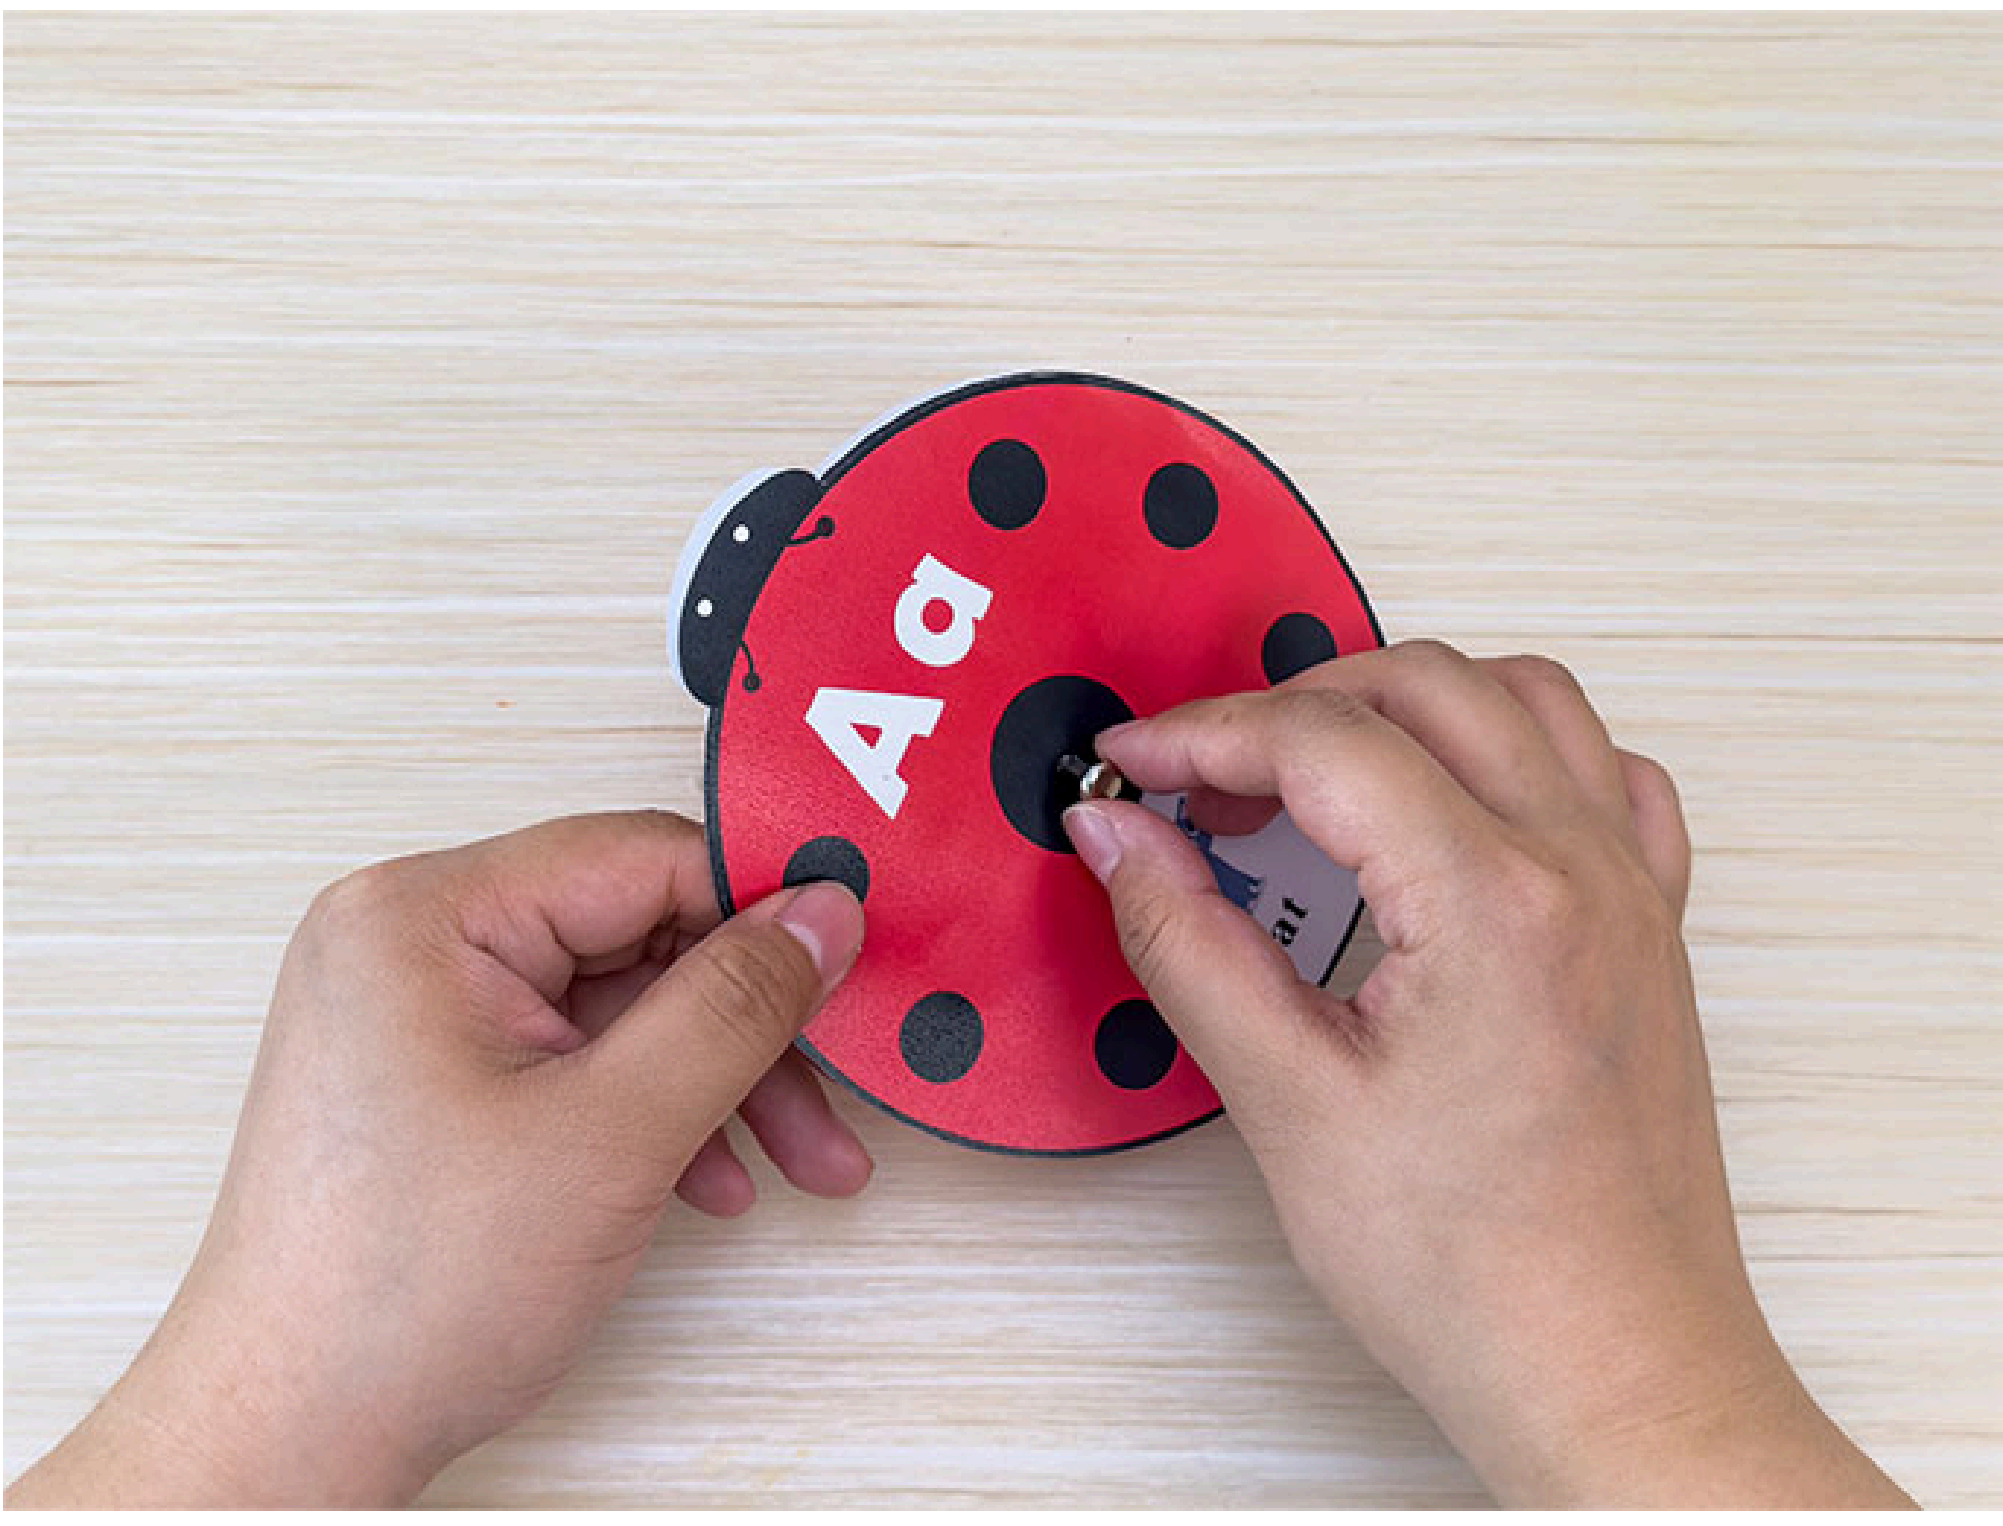

Step 3

Carefully cut out the grey sections from the front of both ladybird templates, following the outline precisely.

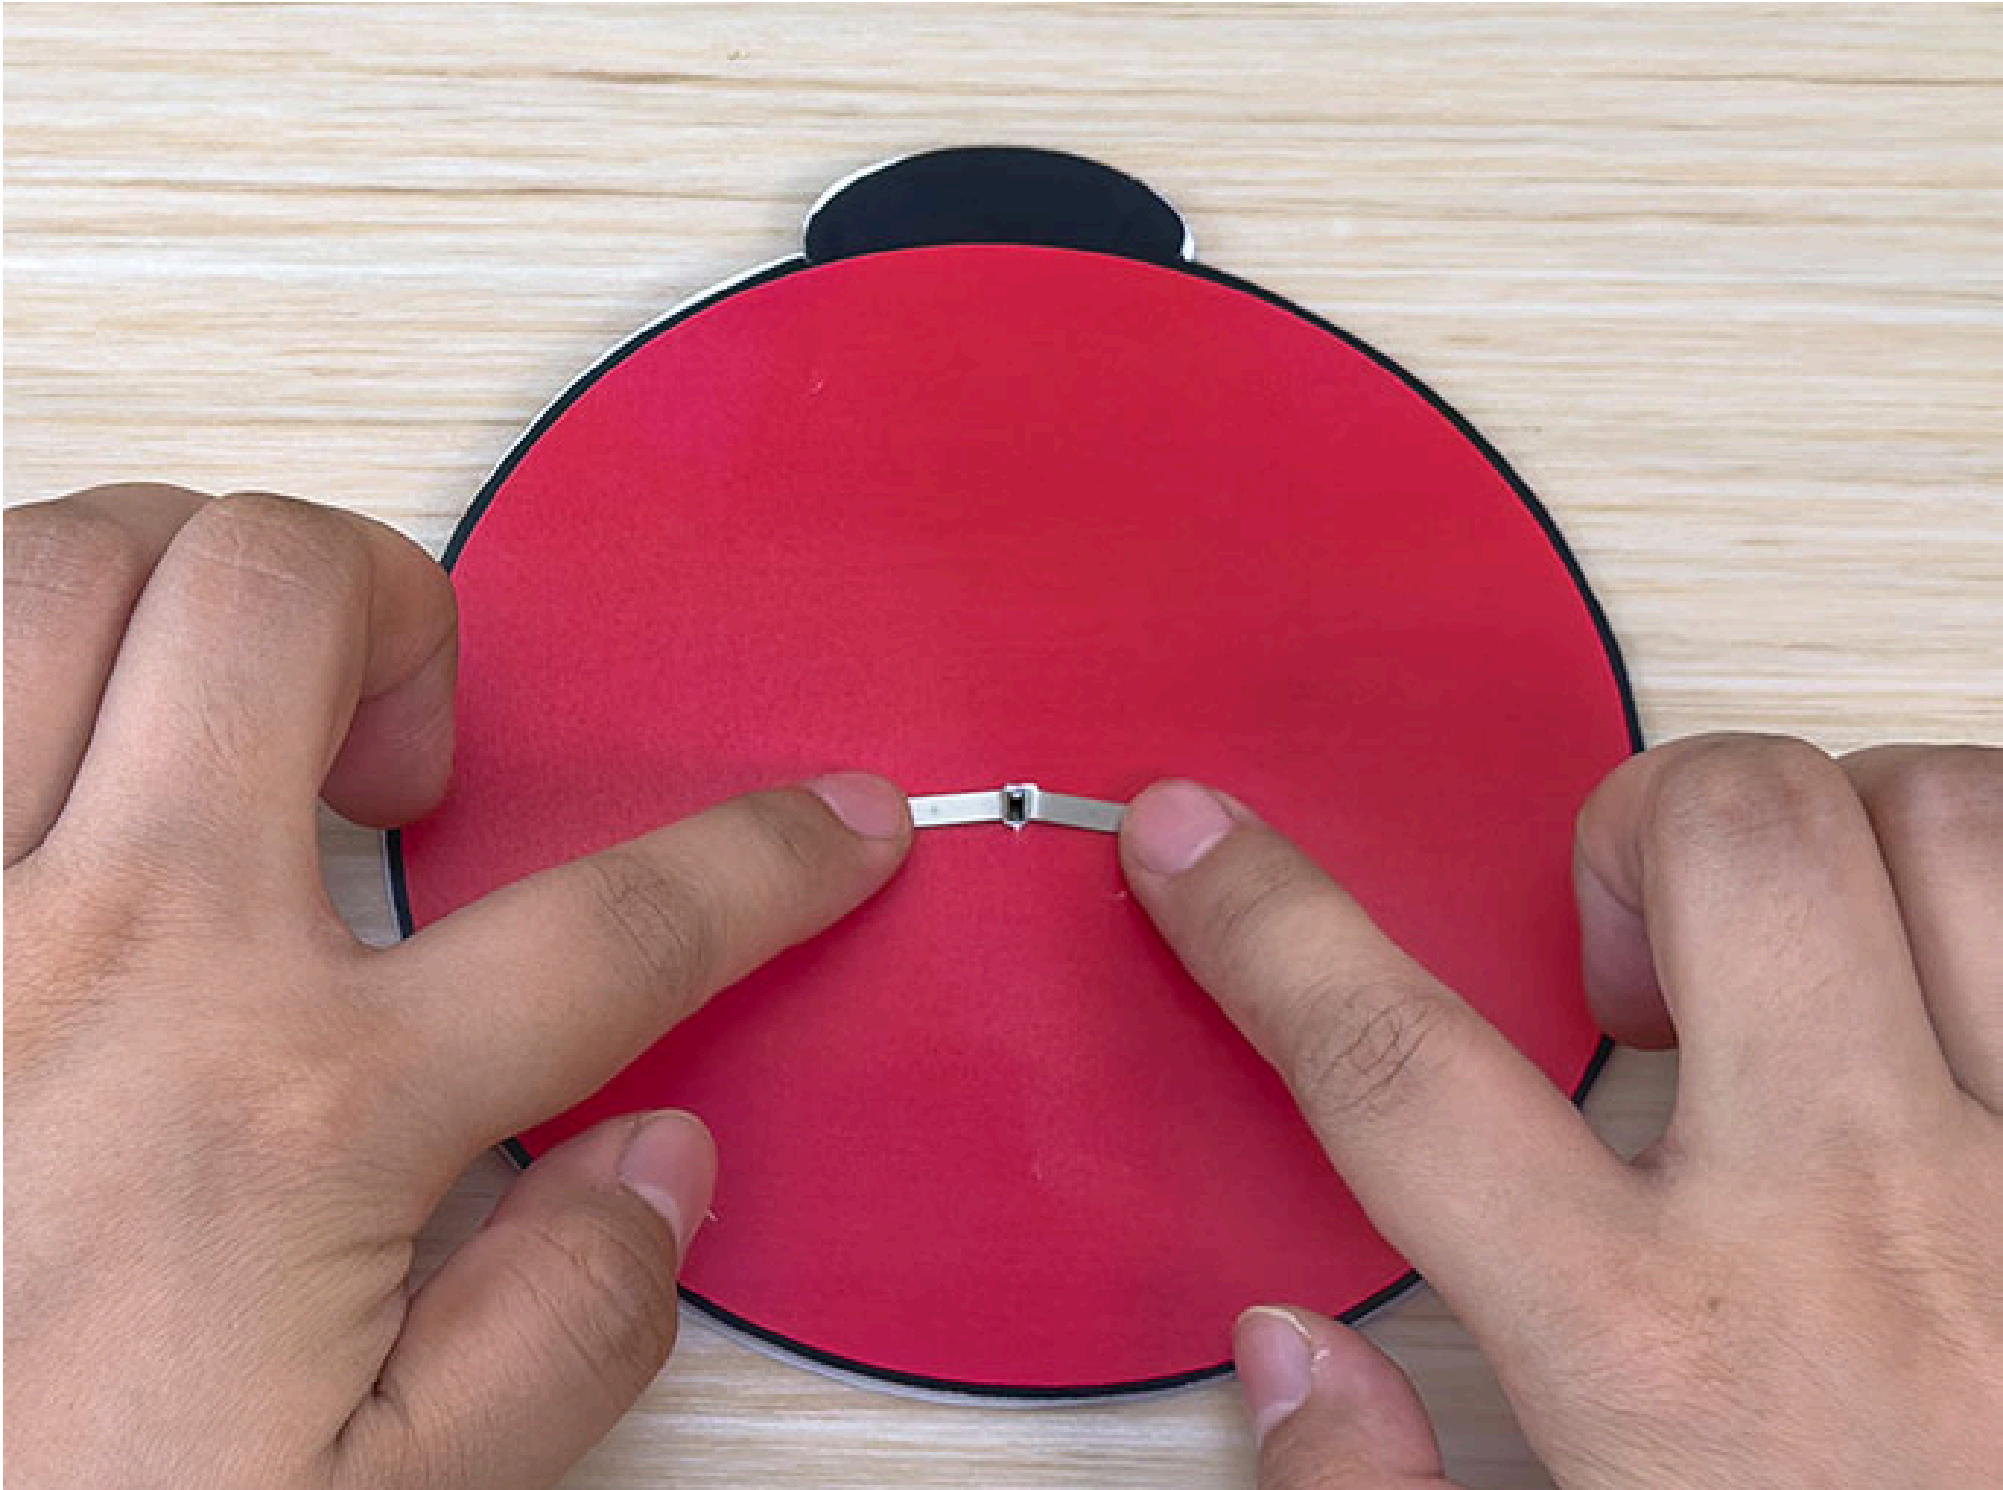

Step 4

Layer the pieces in this order: ladybird front - content card - ladybird back. Make sure the red sides of the ladybirds face outward. Insert the split pin through the centre holes of all three pieces.

Step 5

Flip the assembled ladybird over and secure the split pin.

Step 6

Apply double-sided tape along the edge of the ladybird's head, then align and secure both sides together.

Step 7

Repeat the process for the second ladybird.

Step 8

Your alphabet spinner is ready to use - start learning!
