

Saltwater Slime

Stem Activities

Ages: 6-8

Less than 30 minutes

Grownup needed

This is a super simple and safe slime recipe that only requires bicarbonate of soda, table salt, water and PVA glue. Combined with colourful food colouring, you can create your very own unique saltwater slime.

Materials Needed

1 cup clear PVA glue
1/2 teaspoon bicarbonate of soda
1/4 cup water
Green food colouring
Glitter
1 tablespoon saturated salt water

Step-by-step tutorial

Step 1

Mix 1 cup of clear PVA glue with 1/4 cup water in a bowl until well combined.

Step 2

Add food colouring and glitter according to your preference.

Step 3

Add 1/2 teaspoon of bicarbonate of soda.

Step 4

Next, add 1 tablespoon of saturated salt water and mix well. You'll notice the slime starting to thicken and pull away from the sides of the bowl. If your slime still feels too sticky, you might need to add a few more drops of saturated salt water.

Step 5

Now you can start playing with your slime! Add some foam balls or your favourite decorative items to enhance the texture!
